## RESEARCH PROJECTS

---

<b>Improving Performance of Apache Spark Jobs</b> <i>Research Assistant</i>	Aug 2015 - May 2018 <i>University of Connecticut</i>
--	---

- Developed an interference model to predict the execution time of multiple Spark jobs, and implemented an interference aware job scheduling algorithm to reduce the total execution time.
- Designed a framework to predict and mitigate potential task stragglers and skewed task distribution problems for Apache Spark platform.

<b>Performance Prediction for Apache Spark Jobs</b> <i>Research Assistant</i>	Oct 2014 - May 2015 <i>University of Connecticut</i>
--	---

- Parsed JSON format event logs of Apache Spark jobs, and analyzed task execution pattern.
- Developed an analytical performance model to predict time, I/O overhead and memory consumption.

<b>Learning Environment for Smart Grid Security</b> <i>Research Assistant</i>	Aug 2013 - Feb 2014 <i>Georgia State University</i>
--	--

- Implemented an online tool using JSP and jQuery to schedule Smart Grid emulator for course design.

<b>Optimizing Hadoop MapReduce</b> <i>Research Assistant</i>	Nov 2011 - Dec 2012 <i>Beihang University</i>
---	--

- Applied BTrace to trace MapReduce job functions, and monitor resource consumption using Ganglia.
- Constructed Hadoop performance model for execution time prediction.
- Designed heuristic search algorithm to find near optimal configurations for MapReduce jobs.
